2. Summary

Figures presented on a like-for-like basis: ^(*)

Net interest income

Net interest income has continued to grow in the quarter, showing an increase of 3.8% due to lower impact of TSB's one-offs. Excluding this impact, net interest income grew by 0.9%. Excluding TSB, net interest income increased by 1.1%, driven by strong volumes growth.

Year-on-year, net interest income grows 0.7% considering a constant exchange rate and 0.8% excluding TSB.

Strong fees and commissions performance continues, growing by 5.9% (1.8% excluding TSB) driven by service fees and lower one-offs at TSB.

Fees and commissions increased year-on-year considering a constant exchange rate of 8.7% (10.8% excluding TSB). Excluding the impact of the waiver of TSB overdraft fees, growth of 9.4% year-on-year.

Operating expenses

Recurrent operating expenses showed a reduction of -1.5% on a quarter-on-quarter basis due to lower TSB costs. At the end of September 2018 they amounted to €-1,985.9 million, a year-on-year increase of 1.5%.

Non-recurrent costs in the year amounted to €-212.8 million, and €-69.6 million in the quarter mainly due to TSB migration and post-migration costs.

3. Performance review

Macroeconomic environment

Global economic, political and financial background

Trade tensions have continued to remain centre of attention over the last few months. In particular, the United States increased the volume of imports from China subject to trade tariffs, whilst China retaliated in the same way, although in a more restrained manner. With regards to Brexit, there is still uncertainty over whether the UK and the EU will reach an agreement, and whether this agreement will be ratified by the British parliament. Both parties insist on their willingness to reach an exit deal, yet they still have not reached an agreement on how to prevent a hard border in Ireland, nor on the way in which the future trade relationship will be developed. In the Euro Zone, the Italian government announced that the fiscal deficit for 2019 will be 2.4% of GDP, above the European Commission's recommendation (2.0%) which has generated unease in European institutions. On a positive note, it is worth highlighting that Greece has completed its international rescue programme.

Lastly, with regards to activity, the United States has continued to show notable strength. GDP growth in 2Q18 has continued to be supported by fiscal stimulus, whilst at the same time, the unemployment rate has continued to remain close to historic minimums. In the Euro Zone, activity has continued to increase at a solid pace, and in 2Q18 GDP grew by 0.4% on a quarterly basis, in the same way as in the previous quarter. Economic sentiment indicators show that in 3Q18 the economy continued growing at a similar rate to that seen in 2Q18.

Economic situation in Spain

The economy has continued growing at a strong pace, although it shows some signs of slow-down. Tourism and higher oil prices are contributing to this slow-down in activity. Thus, after the INE review of the historic series, GDP grew by 0.6% on a quarterly basis in the first two quarters of 2018 (2017 average: 0.8%). In 3Q18 the main activity indicators show a worse performance than that observed in the first half of the year, whilst business sentiment indicators are clearly below the levels reached in the previous year. In this context, Bank of Spain has revised its growth estimations for 2018-2020 downwards.

In terms of the labour market, the unemployment rate in 2Q18 (15.3%) stood at minimum levels since 4Q08, although the rate of affiliations to Social Security has slowed down during 3Q18. In terms of the real estate market, housing purchases have continued to show a positive level of dynamism until May, albeit more moderate than in 2017, whilst house prices have continue to register notable growth rates (2Q18: 6.9% year-on-year).

In terms of government accounts, the government submitted draft budgets for 2019, although it is not clear whether they will be approved in parliament, as the prime minister is governing as a minority.

Economic situation in the United Kingdom

Activity indicators show that GDP could have shown more dynamism in 3Q18 than in the previous quarter (2Q18: 0.4% on a quarterly basis), favoured by a particularly warm climate. In particular, indicators in the retail trade sector stand out positively.

In terms of the labour market, the unemployment rate has continued to decline, reaching minimum levels since March 1975 (4.0%). Furthermore, salaries- in real terms- have increased for the seventh consecutive month in August, after a year of declines.

With regards to inflation, it has remained above the target set by Bank of England (BoE) during 3Q18, influenced by the persistence, to a certain extent, of the effects of the depreciation of the pound due to Brexit. Housing prices continue showing a slowdown in growth, which largely comes from Brexit uncertainty.

With regards to the foreign sector, the UK registered a current account deficit in 2Q18 of 3.9% of GDP, which represents the highest deficit since 2Q17, driven by an increase in the import of goods and investment income in the United Kingdom from non-residents.

Economic situation in Latin America

In Mexico, the economy continued to remain weak. In particular, GDP growth, halfway through the year, has slowed down with regards to the 2017 growth rate. In the meantime, inflation has increased slightly, which has led the central bank of Mexico, in its October meeting, to maintain the official rate at 7.75%, showing a hawkish tone in spite of a less trade uncertainty due to the trilateral agreement reached with the United States and Canada. The bank's prudential stance reflects its concerns regarding inflation dynamics, with a risk balance that is clearly biased upwards. Financial assets in the country have shown a more positive performance. This has been linked to the pragmatic discourse by the new president, and his closer proximity to the business sector.

In South America, financial assets in Argentina have continued to be penalised due to the delicate fiscal situation in the country. In fact, the authorities have requested increased financial help from the IMF, and an advance on the support promised just a few months ago. With regards to Brazil, it is worth mentioning that markets have reacted positively to Bolsonaro's victory in the first round of the presidential elections, mainly due to the fact that the economic programme proposed by his main advisor is orthodox, on the contrary to the more interventionist agenda of his rival F. Haddad. In Colombia, Peru and Chile, data continues to point towards favourable economic dynamics.

Fixed-income markets

The central banks of the principal developed economies have continued to take steps towards the normalisation of their monetary policies. Thus, the Fed, in its September meeting, hiked official rates again, to the range of 2.00-

2.25%. The central bank no longer considers the current monetary policy stance as accommodative. The ECB has shown to be more positive with regards to inflation. In particular, Draghi, President of the European Central Bank, has said that he sees a “relatively vigorous” increase in prices. Furthermore, the ECB has confirmed that from October onwards it will reduce its monthly asset purchasing programme to €15bn, and reaffirmed that the asset purchase programme will end in December this year. Lastly, BoE, in its August meeting, hiked the benchmark rate up to 25bp, to 0.75%. The central bank reiterated that its monetary policy will continue to be conditioned by the outcome of Brexit, yet that its intention continues to be gradually hiking the interest rate over the next few years.

The long term government debt yields in Germany and the United States ended the quarter at higher levels than in the previous year. Yields was driven upwards due to the more positive tone of the ECB on inflation, the increase in oil prices (which reached maximums since summer 2014) and good economic activity data in the United States. On the contrary, it was dragged by financial tensions in the most vulnerable emerging economies and the uncertainty

regarding Italian budgets. This uncertainty led to an increase in the Italian risk premium and it remained at high levels. For Spain and Portugal, the contagion from Italy was limited and the risk premium of both countries ended the quarter at similar levels to those seen in the previous quarter.

Equity markets

Once again, Japanese equities index, Nikkei, has led earnings during the quarter, with a +8.1% increase during the quarter in yens, although due to the appreciation of the euro, earnings in euros have been reduced to +6.1%. Once again, the S&P 500 has ranked just below the Nikkei, with a +7.2% increase in dollars and +7.8% in euros. With regards to European stock indices, a generally mixed performance has been observed, with the Euro STOXX 50 remaining flat (+0.1% in euros). French CAC has stood out positively, increasing by +3.2%. The DAX has stood out negatively, falling by -0.5% and its worse performance has been associated with periphery indices, with the IBEX 35 falling by -2.4% and the Italian MIB index falling by -4.2%, affected by uncertainty in terms of 2019 government accounts.

Net interest income:

Net interest income amounted to €2,742.7 million at the end of September 2018, representing a 3.8% increase in the quarter due to lower impact of TSB's one-offs. Excluding those one-offs, net interest income grew by 0.9%. On a like-for-like basis, and considering a constant exchange rate, year-on-year growth amounted to 0.7% and a 4.1% increase in the quarter.

Excluding TSB, net interest income amounted to €1,995.8 million at end September 2018, representing a year-on-year increase of 0.8% on a like-for-like basis. In the quarter, it grew by 1.1%, driven by strong volumes growth.

TSB's net interest income stood at €746.9 million, with a year-on-year decline of -3.8% (remaining stable on a like-for-like basis and considering a constant exchange rate) and growth of 11.5% on a quarterly basis due to lower impact of post-migration one-offs.

Customer spread and net interest margin:

Excluding TSB's one-offs, customer spread stood at 2.75% (2.77% in the previous quarter) and net interest margin over average total assets stood at 1.71% (1.72% in the previous quarter). Customer spread at the end of the quarter stood at 2.73% and net interest margin over average total assets stood at 1.70%.

Excluding TSB, customer spread at the end of the quarter reached 2.67% (2.72% in the previous quarter) driven by strong volumes in lower yield segments, the downward pressure of the Euribor and higher deposits costs in non euro currency. Net interest income over average total assets stood at 1.57%, remaining stable compared to the previous quarter.

Balance sheet

Highlights:

Strong volume growth trend confirmed, with performing gross loans growing at 1.9% assuming a constant exchange rate on a year-on-year basis (3.6% excluding TSB). Excluding the impact of the APS NPL run-off ⁽¹⁾, showed 3.1% year-on-year growth considering a constant exchange rate (5.4% excluding TSB), driven by the good performance of SMEs and Corporates. During the quarter, slightly decline of -0.3% (0.3% growth excluding TSB). Solid performance of mortgages to individuals, which grew 1.2% on a quarterly basis and by 1.0% year-on-year.

On-balance sheet customer funds grew at a constant exchange rate, reaching 3.1% (5.3% excluding TBS) on a year-on-year basis and -0.4% (-0.2% excluding TSB) on a quarterly basis.

Off-balance sheet funds increased by 4.5% year-on-year and by 0.6% in the quarter, driven by mutual funds.

Decrease in TSB lending in the quarter, mainly due to the reduction in core mortgages, due to conscious management actions taken pre and post migration, although balances grew year-on-year. Customer funds declined by -1.1% in the quarter (-0.9% considering a constant exchange rate) mainly due to the decision taken early in 2018 to manage deposits volumes through the 2018 "ISA season" given TSB strong liquidity position.

⁽¹⁾ 80% of the APS problematic exposure, the risk of which is assumed by the DGF, as well as the change in the net loans and receivables account.

- **Other geographies:**

Other Geographies mostly comprises Mexico, overseas branches and representative offices that offer all types of banking and financial services of Corporate Banking, Private Banking and Business and Retail Banking.

The information presented here is based on the separate financial statements of each Group company, with the corresponding disposals and adjustments in the scope of consolidation and the analytical accounting of income and expenses in cases in which a business is spread over one or more legal entities, to enable revenues and costs to be allocated for each customer depending on the business unit to which that customer is assigned.

Each business unit is treated as an independent business, therefore commissioning takes place between businesses for the provision of services involving the distribution of products, services and systems. The overall net impact of commissioning between business units is zero.

Each business unit bears its own direct costs, on the basis of general and analytical accounting, as well as the indirect costs of corporate units.

Key data relating to the segmentation of the Group's activity are given hereafter.

On 16 July, DBRS Rating Limited has raised Banco Sabadell's outlook to positive (from stable) and affirmed its long-term credit rating to BBB (high) and its short-term rating to R-1 (low). Banco Sabadell informs of the transfer of almost all of its real estate exposure to a subsidiary of Cerberus Capital Management L.P.

On 19 July Banco Sabadell has reached an agreement on the date hereof for the transfer of almost the whole of its real estate exposure to an affiliate of Cerberus Capital Management, L.P. ("Cerberus" and the "Transaction"). The real estate assets included in the Transaction have a gross book value, altogether, of circa € 9,100 million and a net book value, altogether, of circa € 3,900 million. The Transaction has been structured through the transfer of two real estate portfolios commercially identified as "Challenger" and "Coliseum" to one or more newly incorporated companies (the "NewCo(s)"), the share capital of which will be contributed and/or transferred so that Cerberus, directly or indirectly, owns a 80% interest in the NewCo(s)'s share capital and Banco Sabadell the remaining 20% interest. Banco Sabadell and Cerberus will enter into a shareholders' agreement to set forth their contractual relationships as partners of the NewCo(s). Solvia Servicios Inmobiliarios, S.L.U., that will remain wholly owned by Banco Sabadell, will continue to service on an exclusive basis the real estate assets included to the Transaction. Closing of the Transaction, that will occur once the relevant authorizations are obtained and the conditions regarding each of the portfolios are complied with, will imply the transfer of the control over the real estate assets included in the Transaction and, hence, their deconsolidation from the balance sheet of Banco Sabadell group. The Transaction contributes positively to enhancing the profitability of Banco Sabadell group, requiring the recognition of additional provisions with a net impact of € 92 million, and will create a positive impact of 13 basis points on the capital ratio of Common Equity Tier 1 (fully-loaded) of Banco Sabadell.
